AUTOMOTIVE

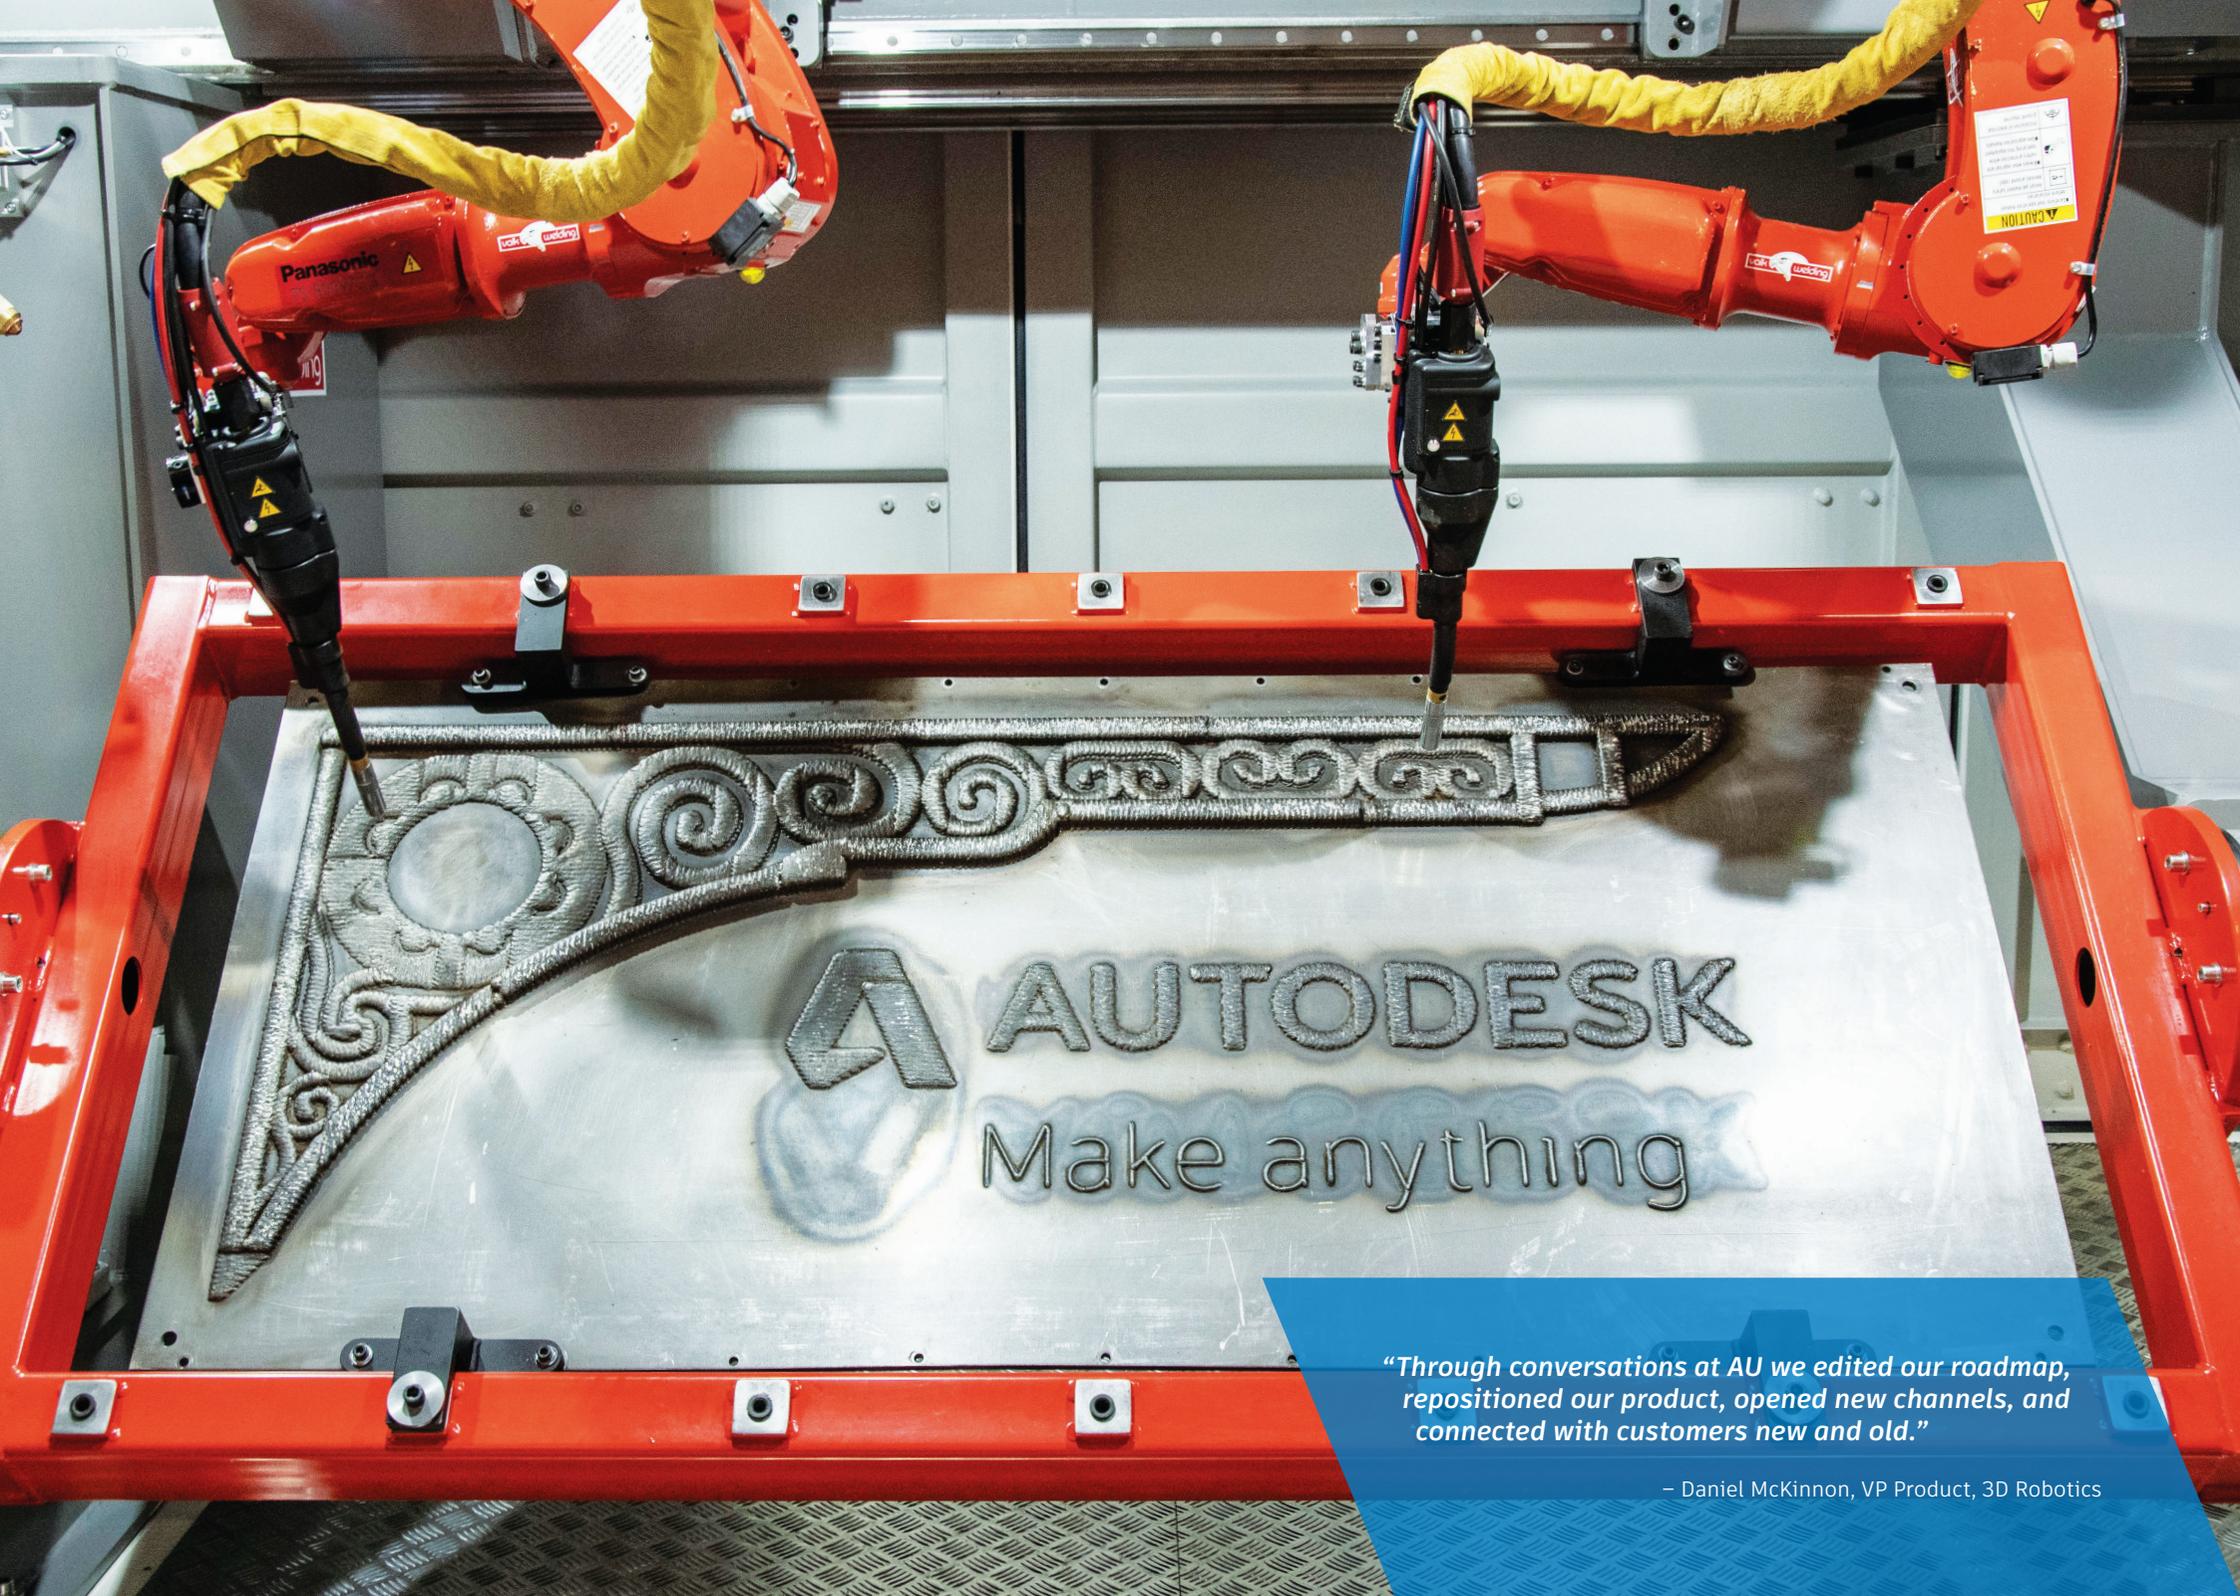

"A great learning opportunity, and a "must" for those who want to advance and elevate the productivity of the team, and the efficiency of workforce."

– Emeline Gabbour, Architectural Technician, Gorman & Company

Attend the conference for those who design, create, and make the world around us

Autodesk University (AU) is your chance to connect with the best in the business. You share technical knowledge, solve business challenges, and benefit from a deeper understanding of cross-industry opportunities. You learn about best practices and the latest trends, while experiencing advanced technology firsthand. Join your global community of designers and engineers.

“Through conversations at AU we edited our roadmap, repositioned our product, opened new channels, and connected with customers new and old.”

– Daniel McKinnon, VP Product, 3D Robotics

Take your skills, career, and company to a new level

Your work is complex and ever changing. It's dependent on the tools you put in place and the relationships you nurture. At AU, you learn from peers and thought leaders embracing new technologies to catapult how they solve business challenges and drive industry-wide innovation. Through classes, keynotes, labs, and networking receptions, you explore solutions for immediate implementation in your daily workflow. AU is the intersection of people and technology across all industries that leaves you and your team inspired.

Why you should attend AU

- Learn from experts and visionaries in a cross-industry setting
- Solve business challenges and formulate new plans with your team
- Work directly with Autodesk to refine the next iteration of tools
- Network with other professionals and global experts

Why you should bring your team

- Take advantage of best-in-class learning and team building opportunities
- Identify and develop future leaders and in-house innovators
- Benefit from advanced workflows and best practices
- Create a more cohesive workforce fueled by new collective knowledge

The world is changing. Are you ready?

Experience how technology trends are driving new ways to design, make, and use things

Put leading-edge technologies into practice today through classes, workshops, sessions, and interactive galleries

Learn about technologies that will impact you including cloud computing, generative design, and machine-human collaboration

See firsthand how anyone can be an innovator with the right tools and guidance
